STEP 1 – Open box carefully and check to make sure all parts have arrived.

STEP 2 — The front of the Mini Trak will contain the Tumbi Trak logo in the bottom right corner. Flip the Mini Trak over. In the back end opposite of the logo insert the extensions into the two leg holes with the larger holes for the D-2 spring knob facing inwards. Insert the Snapper Pin through the smaller bottom hole, securing the extension to the Mini Trak.

STEP 3 – Insert the longer Mini Trak foot in the extension making sure the holes line up with the D-2 spring knob holes. Attach the D-1 knobs in the lower hole facing the front of the Mini Trak and tighten to secure the extension. Insert the longer D-2 spring knob in the holes facing each other and turn till tight. You will then be able to loosen and pull on the knob to allow the legs to slide up and down to change the height.

STEP 4 – Locate the front of the Mini Trak. Insert the shorter foot with the smaller D-1 knob holes facing inwards. Insert the Snapper Pin through the smaller bottom hole, securing the leg to the Mini Trak. Secure the legs by turning the D-1 knobs tight.
